

VU VAN THONG

Security Operations / SOC Analyst Intern

0968046024 | vvthong.insec@gmail.com | vanity1412.github.io/portfolio_VVT/ | github.com/vanity1412 | Ho Chi Minh City, Viet Nam

PROFESSIONAL SUMMARY

Information Security student focused on SOC monitoring, alert triage, security incident investigation, and basic incident response. Hands-on with Wazuh SIEM, Suricata IDS, Linux log analysis, and network monitoring labs. Able to investigate alerts, validate evidence, classify severity, document incident timelines, and recommend initial containment or escalation actions. Willing to coordinate with related teams and higher-tier analysts during incident handling.

EDUCATION

HCMUTE | Information Security Engineer

2023 - Present

GPA: 3.2 / 4.0 | 50% Scholarship in 2023 | Scholarship in 2026

Relevant Coursework: Network Security Monitoring, Network Security, Web Application Security, Malware Analysis, Advanced Computer Networks, Operating Systems, Python Programming

SKILLS

Security Operations: Alert triage, incident investigation, evidence documentation, severity classification, escalation workflow, shift handover reporting

SIEM & Log Analysis: Wazuh SIEM, Linux authentication/syslog analysis, Suricata IDS alerts, OpenSearch/Splunk basics, log correlation

Monitoring & Response: Infrastructure monitoring, SNMP basics, server/network device status, dashboard and alert configuration, firewall containment basics

Systems & Networking: Linux CLI, Windows basics, TCP/IP, DNS, HTTP/HTTPS, ports/services, routing fundamentals

Security Tools: Wazuh, Suricata, Wireshark basics, Nmap, Hydra, UFW, Zabbix, Nagios/PRTG basics

PROJECTS

Mini SOC Lab: Wazuh SIEM, Suricata IDS & Incident Response | Personal Project

2026

- Built a 3-VM SOC lab to simulate SOC Tier 1 alert triage and basic incident response workflow.
- Investigated SSH brute-force and port-scan alerts using Wazuh events, raw Linux logs, source IPs, timestamps, and affected services.
- Integrated Suricata IDS logs with Wazuh to analyze suspicious network traffic and validate alert evidence.
- Performed initial containment by blocking attacker IPs with UFW and documented incident tickets with evidence, timeline, severity, impact, and follow-up notes.

Network Security Monitoring System | Lab Project

2026

- Practiced monitoring servers, switches, routers, and firewall devices using infrastructure monitoring tools and SNMP-based metrics.
- Configured monitoring concepts such as host discovery, service checks, thresholds, dashboards, and email-style alerts for abnormal device or service behavior.
- Analyzed availability, resource usage, service status, and network health indicators to identify affected assets and operational impact.
- Documented alert context, impact, escalation notes, and recommended response actions in a SOC-style format.

SECURITY TRAINING & WRITE-UPS

Blue-Team / SOC Hands-on Labs | Self-learning

2024 - Present

- Practicing SOC Level 1/2 labs on TryHackMe, CyberDefenders, and Hack The Box Sherlock, focusing on alert triage, log analysis, network traffic investigation, phishing/malware indicators, and incident timeline reconstruction.
- Wrote blue-team write-ups documenting investigation steps, evidence collection, root cause analysis, attack timeline, IOCs, and remediation recommendations.
- Practiced PortSwigger Web Security Academy labs to understand web attack behavior and related log indicators for defensive investigation.

ACADEMIC CYBERSECURITY EXPERIENCE & ACTIVITIES

N3tw0rkGhosts CTF Team | Security Member

2025 - Present

- Participated in cybersecurity CTF competitions with focus on crypto, forensic
- Ranked Top 13 on CTFTIME Vietnam 2026 and Top 28 on CTFTIME Vietnam 2025 with the team.

HCMUTE Academic Cybersecurity Competitions | Participant

2024 - 2025

- Top 2 in HCMUTE academic cybersecurity CTF competition 2024; Top 5 in 2025.
- Top 5 student representative for Vietnam Student Mathematics Olympiad 2024.

CERTIFICATIONS

2025 - Certified Associate Penetration Tester (CAPT) | 2025 - Certified Threat Intelligence & Governance Analyst (CTIGA) | 2024 - MOS Microsoft Office Specialist: Word, Excel, PowerPoint
